

Minor E. Gordon, Ph.D.

Curriculum Vitae

cv256@minorgordon.net

<https://mg4.consulting>

<https://github.com/minorg>

Ankeny, IA 50021

Summary

I am a **computer scientist, software engineer**, and **thinker-doer**. I am passionate about applying technology in ways that help individuals and society. I am a lifelong learner and avid reader, not just in the depth of my field but in the breadth of others, especially history.

Education

2009	Ph.D., Computer Science , University of Cambridge
2005	Diplom Informatiker , Technische Universität Berlin
2003	B.Sc., Computer Science , Oklahoma State University Tulsa

Work Experience

04/2018 – 4/2019	Software architect and technical lead at <u>Asemio, LLC</u> / Tulsa, OK Asemio is a technology consulting company for community data systems. The company works with organizations that are solving complex problems in the criminal justice, education, health, and social sectors. Responsibilities Project planning: user story mapping, release design, technical architecture, time estimation Subject matter expertise: responding to RFPs and other internal and external needs for technical expertise Technical leadership: mentoring junior developers, code reviews, process development, flower arranging Recruiting: outreach, reviewing resumes, coordinating, interviewing Software development: design and implementation of strategic projects
07/2012 –	Independent software consultant at <u>MG4 Consulting, LLC</u> (self-employed) / Remote
12/2011 – 06/2012	Software architect and full-stack developer at Grokio, LLC / New York, NY GrokIO was a business intelligence startup I co-founded.
08/2011 – 12/2011	Software architect and backend developer at <u>Birchbox Inc.</u> / New York, NY Birchbox is a personalized subscription service for women's cosmetics samples.
05/2011 – 08/2011	Backend developer at <u>Chartbeat Inc.</u> / New York, NY Chartbeat is a real-time web analytics software-as-a-service provider.
10/2010 – 04/2011	Software engineer at IBM Research / Hawthorne, NY
01/2009 – 07/2010	Programmer / Analyst at NEC High Performance Computing Europe GmbH / Stuttgart, Germany

Industry Projects

04/2018 – 4/2019	Privacy-preserving record linker at <u>Asemio, LLC</u> / Tulsa, OK Designed and implemented a privacy-preserving record linker for determining overlap between HIPAA and FERPA protected data sets, using the Sharemind platform for secure multi-party computation, Python libraries and scripts, and C++ Wrote a white paper describing the record linking process and comparing its results to plaintext record linking with deterministic and probabilistic algorithms Drafted and was awarded a \$25,000 grant from a national foundation to fund this work
04/2018 – 4/2019	Community asset mapping platform at <u>Asemio, LLC</u> / Tulsa, OK Designed and implemented a web application for tracking community assets such as service organizations, funders, collaboratives, data sharing platforms, et al. The web application was developed with

TypeScript+React.js, Python+Flask, and a neo4j graph database. Data was entered by subject matter experts using a bespoke Python-based domain-specific language.

- 06/2017 – Motivated Cognition experiment at Columbia University / New York, NY**
Motivated Cognition is a psychology research experiment investigating the effects of cognitive bias on our consumption of information online.
Created a complete web application from high-level requirements, using TypeScript, Knockout.js, and webpack on the frontend; Java with microservices, YAML configuration, and MongoDB persistence on the backend; generated code for models and services in TypeScript and Java; Jenkins continuous integration; and Docker deployment
Translated screens from a graphic designer into pixel-perfect CSS and HTML
Integrated with Mechanical Turk for subject recruitment
- 04/2017 – 05/2017 Drug name comparison project for PSW Applied Research Inc. / Toronto, ON**
Implemented Kondrak's phonetic alignment and similarity algorithm (ALINE) and a bigram-based orthographic algorithm (BI-SIM) as a PostgreSQL C extension
Built a JavaScript demo application using jQuery and Bootstrap
- 04/2016 – 04/2018 Full-stack development for Polygon Analytics Ltd. / Edinburgh, Scotland**
Designed and implemented proprietary software in C++ and Python
- 09/2014 – Notablist email newsletter search engine for Notablist, Inc. / New York, NY**
Notablist indexes millions of email newsletters from hundreds of thousands of publishers and provides both a search interface and real-time change alerts to users.
Backend prototyping in Python:
 - Classified signup responses and mapped form inputs using numpy/scipy/scikit-learnBackend production rewrite in Java:
 - Generated Python JSON-RPC clients, Python command line tools, Java service interfaces and abstract implementations, and Java JSON-RPC servlets from Thrift interface and data structure definitions
 - Implemented Guice-injected Java micro-services that encapsulated MongoDB collections; ElasticSearch indices; Redis databases; S3 buckets; screenshotting and signups with Selenium; SpamAssassin checking; logstash queries; Stripe integration; Drip (CRM) integration; MailChimp, SparkPost, and SendGrid transactional email posting; etcd locking; DNS and whois querying and parsing; DMOZ category and Alexa and Quantcast rank lookups
 - Designed and implemented a scalable distributed system for processing Common Crawl WARC records and submitting newsletter signups
 - Reported metrics to InfluxDB
 - Created administrative user interface in Vaadin
 - Set up Jenkins continuous integration
 - Deployed with Docker+Kubernetes on real hardwareFrontend:
 - Assumed responsibility for a three year-old Bootstrap+Backbone.js+Marionette.js code base in JavaScript
 - Incrementally migrated code to TypeScript with Knockout.js
 - Added Selenium (Java) browser tests
- 04/2014 – 07/2014 Development of the Muninn Project for PSW Applied Research Inc. / Toronto, ON**
Created a command-line Java application for transcribing handwritten World War I medical records from the Canadian Expeditionary Force (<http://blog.muninn-project.org/node/79>) using Amazon's Mechanical Turk crowdsourcing service: precut images for groups of lines, redundancy between workers, artificially-introduced mistakes and edit distances to detect cheating, and feedback to workers. The results were published as Linked Open Data on the Canada Open Data Portal.
- 03/2013 – 07/2013 Txtmrkt, a marketplace for digital publications / New York, NY**
Designed and implemented a Model-View-Controller-based Java web application with Guice-injected

microservices backed by Amazon S3

Authenticated and authorized users with Shiro

Integrated co-branded order placement and payment notification with Amazon's Flexible Payments Service

07/2012 –

TeraScript product suite for **Tronics Software, LLC** / El Dorado, CA

TeraScribe and TeraScript Server are a visual development environment and server-based runtime for TeraScript Action Files (TAFs), TeraScript Class Files (TCFs), and the TeraScript Markup Language (TML). TML is a markup-based web application language, similar in spirit to ColdFusion. TAF and TCF are ways of organizing TML.

TeraScript Server 8:

Rewrote TeraScript 7 in Java while maintaining strict backwards compatibility:

- Grammar-based compilers for TML and associated little languages using ANTLR
- Tree interpreters for TML, TAF, and TCF
- Versioned OSGi bundles with Maven and Apache Felix
- Library of standard functions, primitive types, and collections with extensive unit tests

TeraScript Server 7 (formerly Witango Server):

Reorganized, cleaned up, and modernized a 17-year-old C++ code base and addressed numerous bugs and feature requests for the server's first major release in over two years; now in maintenance releases

Eliminated diverging platform-specific build systems (on Win32, Linux, and OS X) in favor of CMake and ported the code base to Win64 using Visual C++ 2012

Designed and implemented a SQL generator that visits dialect-specific trees of SQL-99 constructs

TeraScribe 8:

Reorganized and cleaned up a 10-year-old Java Swing code base in order to add a number of features to the code editor, including autocomplete and syntax highlighting, and refit the data source management interface to use JDBC metadata

Subcontracting:

Debugged production installations of TeraScript Server 7 and 8

Developed cross-platform (Android, iOS, Windows) mobile app prototype with Xamarin Forms and C#

12/2011 – 06/2012 **Haystack business intelligence platform** for **Grokio, LLC** / New York, NY

Designed an agent (Python) and manager (Java with Spring Security+MVC and Guice) architecture for gathering, storing, and querying time series data and metadata

Implemented time series databases from scratch using relational tables and memory-mapped files

Wrote RFC 3986 grammar-based URL and URN parsers using Ragel (Java) and pyparsing (Python)

Generated service interfaces in Java and Python with custom Protocol Buffers compiler plugins

Coded agent plugins in Java and Python for discovering and fetching metric metadata and data:

- Open source monitoring systems: Nagios, Ganglia, collectl, Graphite
- Open source server software: Apache httpd, nginx, MySQL, memcached, MongoDB, JMX
- Platform interfaces: procfs, sysctl, WMI, SNMP
- Third party APIs: Google Analytics, MailChimp, Spring Social, Amazon CloudWatch

Supervised user experience and graphic designers in Ukraine

Implemented a client-side user interface with the Google Web Toolkit, starting from wireframes:

- Architectural best practices: Model-View-Presenter; event bus; activities and places
- Custom widgets: date time range picker, cell table pager, search box, selection tree
- .war deployment to Tomcat with Maven

08/2011 – 12/2011 **Backend development and software architecture** for **Birchbox Inc.** / New York, NY

Designed, implemented, documented, and successfully deployed warehouse integration code in Java (backend) and PHP (administrative frontend)

Wrote a Thrift compiler and targets in Python+pyparsing to generate Java and PHP from Thrift definitions

Produced ad hoc business reports from MySQL using Java and Jython

- 05/2011 – 08/2011** **Benchmarking server stacks in order to provision EC2 instances** at **Chartbeat Inc.** / New York, NY
 Synthesized a realistic benchmark for front-line web servers from statistical analyses of nginx access logs
 Significantly reduced network bandwidth and latency on production servers with targeted optimizations
 Wrote Python scripts for analyzing Ganglia RRDs, replaying HTTP request streams, harnessing httperfs
- 10/2010 – 04/2011** **File I/O library for X10** at **IBM Research** / Hawthorne, NY
 X10 is a type-safe, parallel object-oriented language for high-productivity computing.
 Designed, implemented, tested, and documented a new low-overhead, buffer-based file library for X10:
- inspired by POSIX, FUSE, Boost.Filesystem, and Java NIO.2
 - X10 and native code for the Java and C++ source-to-source compilation backends
 - Scatter/gather I/O, aligned buffers, memory-mapped files, advisory locking
- Microbenchmarked the X10 runtime
- 01/2009 – 07/2010** **LXFS: fast and reliable data storage for computing clusters**, for **NEC HPCE GmbH** / Stuttgart, Germany
 Wrote Python and bash scripts for configuring, deploying, and administrating LXFS installations: Lustre and Inet configuration (MGS, MDS, OSS, clients); redundant NFS exports; Nagios, Ganglia, and collectl monitoring; Heartbeat/Linux-HA services for failover; Promise RAID devices; network interfaces (Infiniband, bonded Ethernet)
 Finished two major LXFS releases, used in numerous deployments
 Debugged and resolved issues in production parallel file systems
- 01/2009 – 07/2010** **XtreemFS: a distributed and replicated file system for WANs**, for **NEC HPCE GmbH** / Stuttgart, Germany
 Designed, implemented, and tested the XtreemFS userspace client:
- FUSE and Dokan (Windows FUSE-like library) interfaces
 - Multiple pipelined ONC-RPC streams to a single server
 - Staged, event-driven concurrency for robust performance under load
 - Close-to-open file caching with per-file page sizes
 - Automatic failover between file replicas on timeout
 - Heavily benchmarked under different I/O loads (iobench, dbench, metadata benchmarks)
- Finished two major XtreemFS releases, both used in production
 Collaborated with academic and industry partners in Europe, Israel, and China

Open Source Projects

- 11/2015 –** **DressDiscover**: suite of web applications for digital costume collections
7/2016 – **Pastpy**: Python library for reading PastPerfect (museum database) exports
7/2012 – **Thryft**: compiler and code generation framework for multilingual web applications

Skills

Languages	English (native); German (fluent)
Programming Frameworks	Java; Python; TypeScript; C++; C; SQL; C#; JavaScript; Scala
Databases	Thrift; Protobufs; Flask; Bootstrap; Knockout.js; React.js
Platforms	ElasticSearch; MongoDB; Redis; PostgreSQL; SQL Server
IDEs and tools	Windows; Debian- and RedHat-based Linux; OS X
Revision control	Visual Studio; Eclipse; IntelliJ; Visual Studio Code; Maven; CMake
	Git; Subversion

Teaching Experience

- 02/2014 – 04/2014** SQL Fundamentals and Python Fundamentals workshops for Ph.D. students and post-doctoral researchers in the natural sciences at Iowa State University / Ames, IA
- 01/2002 – 05/2004** Technical supervision of Masters' theses at Oklahoma State University / Tulsa, OK
- 01/2002 – 03/2002** Mathematics tutoring for 6th and 7th graders at Tulsa Public Schools / Tulsa, OK

Research Experience

- 2005 – 2008** **Doctoral student** / University of Cambridge, Cambridge, UK
Supervisor: Jean Bacon
Examiners: Steven Hand, University of Cambridge; James Larus, Microsoft Research
Research focus: high-performance web servers
Dissertation: Stage scheduling for CPU-intensive servers
Funding: EPSRC grant for the EDSAC 21 project
- 2003 – 2005** **Student research assistant** / Zuse Institut Berlin, Berlin, Germany
Supervisors: Alexander Reinefeld, Hans-Ulrich Hei
Research focus: high-performance web servers
- 2002 – 2003** **Student research assistant** / Oklahoma State University, Tulsa, OK
Supervisor: Marcin Paprzycki
Research focus: software agents, Semantic Web technologies
Diplomarbeit: Staged design for highly concurrent web servers
Funding: full academic scholarship from the State of Oklahoma
