

Minor E. Gordon, Ph.D.

Curriculum Vitae

cv256@minorgordon.net

<https://mg4.consulting>

Tulsa, OK 74114

Summary

I am a **software architect** and **full-stack software engineer** with 9 years of experience in industry. I specialize in building:

- **complex web sites and web applications**, such as [Notablist.com](https://notablist.com);
- **software-as-a-service (SaaS) implementations**; and
- **programming tools**, such as compilers and runtimes for domain-specific languages.

I've worked on projects in a variety of domains, from supercomputing to the digital humanities. My strengths are a solid foundation in Computer Science; a range of hands-on skills; critical thinking; a systematic approach to new problems; attention to detail; high personal standards; a strong work ethic; and the ability to work autonomously. I am a lifelong learner and avid reader, especially in history.

Education

- | | |
|------|---|
| 2009 | Ph.D., Computer Science , University of Cambridge
Dissertation: Stage scheduling for CPU-intensive servers |
| 2005 | Diplom Informatiker , Technische Universität Berlin
Diplomarbeit: Staged design for highly concurrent web servers |
| 2003 | B.Sc., Computer Science , Oklahoma State University Tulsa |

Projects

6/2017 – ongoing **Full-stack development for Motivated Cognition experiment**

Columbia University / New York, NY USA and remote

Motivated Cognition is a psychology research experiment investigating the effects of cognitive bias on our consumption of information online.

- | | |
|------------|---|
| Activities | Created a complete web application from a high-level specification, using TypeScript, Bootstrap, Knockout.js, and webpack on the frontend; Java with microservices, YAML configuration, and MongoDB persistence on the backend; Jenkins continuous integration; and Docker deployment |
| | Generated code for models and services in TypeScript and Java |
| | Integrated with Mechanical Turk for subject recruitment |

4/2016 – ongoing **Full-stack development for Polygon Analytics**

Polygon Analytics Ltd. / Edinburgh, UK (remote only)

- | | |
|------------|---|
| Activities | Designed and implemented proprietary software in C++ and Python |
|------------|---|

9/2014 – ongoing **Software architecture and full-stack development for the [Notablist](#) email newsletter search engine**

New York, NY USA and remote

Notablist indexes millions of email newsletters from hundreds of thousands of publishers and provides both a search interface and real-time change alerts to users.

- | | |
|------------|--|
| Activities | Backend prototyping in Python : <ul style="list-style-type: none">• Classified signup responses and mapped form inputs using numpy/scipy/scikit-learn Backend production rewrite in Java : |
|------------|--|

- Generated Python JSON-RPC clients, Python command line tools, Java service interfaces and abstract implementations, and Java JSON-RPC servlets from Thrift interface and data structure definitions
- Implemented Guice-injected Java micro-services that encapsulated MongoDB collections; Elasticsearch indices; Redis databases; S3 buckets; screenshotting and signups with Selenium; SpamAssassin checking; logstash queries; Stripe integration; Drip (CRM) integration; MailChimp, SparkPost, and SendGrid transactional email posting; etcd locking; DNS and whois querying and parsing; DMOZ category and Alexa and Quantcast rank lookups
- Designed and implemented a scalable distributed system for processing Common Crawl WARC records and submitting newsletter signups
- Created administrative user interface in Vaadin
- Set up Jenkins continuous integration
- Deployed with Docker+Compose on real hardware

Frontend:

- Assumed responsibility for a three year-old Bootstrap+Backbone.js+Marionette.js code base in JavaScript
- Incrementally migrated code from JavaScript to TypeScript
- Added Selenium (Java) browser tests

7/2012 – ongoing Full-stack development of the TeraScript product suite

Tronics Software LLC / Stirling, NJ USA and remote

TeraScribe and TeraScript Server are a visual development environment and server-based runtime for TeraScript Action Files (TAFs), TeraScript Class Files (TCFs), and the TeraScript Markup Language (TML). TML is a markup-based web application language, similar in spirit to ColdFusion. TAF and TCF are ways of organizing TML.

Activities TeraScript Server 8:

Rewrote TeraScript 7 in Java while maintaining strict backwards compatibility:

- ANTLR-based compilers for TML and associated little languages
- Tree interpreters for TML, TAF, and TCF
- Versioned OSGi bundles with Maven and Apache Felix
- Library of standard functions, primitive types, and collections with extensive unit tests

TeraScript Server 7 (formerly Witango Server):

Reorganized, cleaned up, and modernized a 17-year-old C++ code base and addressed numerous bugs and feature requests for the server's first major release in over two years; now in maintenance releases

Eliminated diverging platform-specific build systems (on Win32, Linux, and OS X) in favor of CMake and ported the code base to Win64 using Visual C++ 2012

Designed and implemented a SQL generator that visits dialect-specific trees of SQL-99 constructs

TeraScribe 8:

Reorganized and cleaned up a 10-year-old Java Swing code base in order to add a number of features to the code editor, including autocomplete and syntax highlighting, and refit the data source management interface to use JDBC metadata

Subcontracting:

Debugged production installations of TeraScript Server 7 and 8

Developed cross-platform (Android, iOS, Windows) mobile app prototype with Xamarin Forms and C#

4/2017 – 5/2017 Drug name comparison project

PSW Applied Research Inc. / Toronto, ON and remote

Activities Implemented Kondrak's phonetic alignment and similarity algorithm (ALINE) and a bigram-based orthographic algorithm (BI-SIM) as a PostgreSQL C extension

Built a JavaScript demo application using jQuery and Bootstrap

4/2014 – 7/2014 Application development for the Muninn Project under contract to the Library and Archives Canada

PSW Applied Research Inc. / Toronto, ON and remote

Activities	Created a command-line Java application for transcribing handwritten World War I medical records from the Canadian Expeditionary Force (http://blog.muninn-project.org/node/79) using Amazon's Mechanical Turk crowdsourcing service: pre-cut images for groups of lines, redundancy between workers, artificially-introduced mistakes and edit distances to detect cheating, and feedback to workers
3/2013 – 7/2013	Back end development for <u>Txtmrkt</u>, a marketplace for digital publications Txtmrkt LLC / New York, NY USA and remote
Activities	Designed and implemented a Model-View-Controller-based Java web application with Guice-injected microservices backed by Amazon S3 Authenticated and authorized users with Shiro Integrated co-branded order placement and payment notification with Amazon's Flexible Payments Service
12/2011 – 6/2012	Haystack: performance monitoring platform for online businesses GrokIO LLC / New York, NY USA
Activities	Designed an agent (Python) and manager (Java with Spring Security+MVC and Guice) architecture for gathering, storing, and querying time series data and metadata Implemented time series databases from scratch using relational tables and memory-mapped files Wrote RFC 3986 grammar-based URL and URN parsers using Ragel (Java) and pyparsing (Python) Generated service interfaces in Java and Python with custom Protocol Buffers compiler plugins Coded agent plugins in Java and Python for discovering and fetching metric metadata and data: <ul style="list-style-type: none"> • Open source monitoring systems: Nagios, Ganglia, collectl, Graphite • Open source server software: Apache httpd, nginx, MySQL, memcached, MongoDB, JMX • Platform interfaces: procfs, sysctl, WMI, SNMP • Third party APIs: Google Analytics, MailChimp, Spring Social, Amazon CloudWatch Supervised user experience and graphic designers in Ukraine Implemented a client-side user interface with the Google Web Toolkit, starting from wireframes: <ul style="list-style-type: none"> • Architectural best practices: Model-View-Presenter; event bus; activities and places • Custom widgets: date time range picker, cell table pager, search box, selection tree • .war deployment to Tomcat with Maven
8/2011 – 12/2011	Back end development for <u>Birchbox</u>, a personalized subscription service for women's cosmetics samples Birchbox Inc. / New York, NY, USA
Activities	Designed, implemented, documented, and successfully deployed warehouse integration code in Java (back end) and PHP (administrative front end) Wrote a Thrift compiler and targets in Python+pyparsing to generate Java and PHP from Thrift definitions Produced ad hoc business reports from MySQL using Java and Jython
5/2011 – 8/2011	Benchmarking server stacks in order to accurately provision EC2 instances at <u>Chartbeat</u>, a real-time web analytics software-as-a-service provider Chartbeat Inc. / New York, NY, USA
Activities	Synthesized a realistic benchmark for front-line web servers from statistical analyses of nginx access logs Significantly reduced network bandwidth and latency on production servers with targeted optimizations Wrote Python scripts for analyzing Ganglia RRDs, replaying HTTP request streams, harnessing httpfs
10/2010 – 4/2011	File I/O library for <u>X10</u>, a type-safe, parallel object-oriented language for high-productivity computing IBM Research / Hawthorne, NY, USA
Activities	Designed, implemented, tested, and documented a new low-overhead, buffer-based file library for X10: <ul style="list-style-type: none"> • inspired by POSIX, FUSE, Boost.Filesystem, and Java NIO.2 • X10 and native code for the Java and C++ source-to-source compilation backends

- Scatter/gather I/O, aligned buffers, memory-mapped files, advisory locking

Microbenchmarked the X10 runtime

1/2009 – 7/2010 **LXFS: fast and reliable data storage for High-Performance Computing clusters**

NEC High Performance Computing Europe / Stuttgart, Germany

Activities Wrote Python and bash scripts for configuring, deploying, and administrating LXFS installations: Lustre and Inet configuration (MGS, MDS, OSS, clients); redundant NFS exports; Nagios, Ganglia, and collectl monitoring; Heartbeat/Linux-HA services for failover; Promise RAID devices; network interfaces (Infiniband, bonded Ethernet)

Finished two major LXFS releases, used in numerous deployments

Debugged and resolved issues in production parallel file systems

1/2009 – 7/2010 **XtreemFS: a distributed and replicated file system for wide-area networks**

NEC High Performance Computing Europe / Stuttgart, Germany

Activities Designed, implemented, and tested the XtreemFS userspace client:

- FUSE and Dokan (Windows FUSE-like library) interfaces
- Multiple pipelined ONC-RPC streams to a single server
- Staged, event-driven concurrency for robust performance under load
- Close-to-open file caching with per-file page sizes
- Automatic failover between file replicas on timeout
- Heavily benchmarked under different I/O loads (iobench, dbench, metadata benchmarks)

Finished two major XtreemFS releases, both used in production

Collaborated with academic and industry partners in Europe, Israel, and China

Teaching Experience

2/2014 – 4/2014 **SQL Fundamentals and Python Fundamentals workshops for Ph.D. students and post-doctoral researchers in the natural sciences**

Iowa State University / Ames, IA USA

2002 – 2004 **Technical supervision of Masters' theses**

Oklahoma State University / Tulsa, OK USA

1/2002 – 3/2002 **Mathematics tutoring for 6th and 7th graders**

Tulsa Public Schools / Tulsa, OK USA

Computer Skills

Programming	Java; Python; TypeScript; C++; C; SQL; C#; JavaScript
Frameworks	Thrift; Protobufs; Guice; Guava; Shiro; jQuery; Bootstrap; Knockout.js; Backbone.js
Databases	ElasticSearch; MongoDB; Redis; SQLite; H2; SQL Server
Platforms	Windows; Debian- and RedHat-based Linux; OS X
IDEs and tools	Visual Studio; Eclipse; IntelliJ; Visual Studio Code; Maven; CMake
Revision control	Git; Subversion

Personal

Languages English (native); German (fluent)

Hobbies Reading (history, biography, popular science); photography; Tai chi; open source software
